ABOUT STIDE

ENGINEERING SAFE SEATING SOLUTIONS SINCE 1983

With more than 40 years of industry experience, STIDE® is a leading manufacturer of innovative seating and interior solutions for camper vans, commercial vehicles, and the outdoor mobility industry. Built on the core principles of Safety, Technology, Innovation, Design, and Experience, we develop products that combine premium quality with certified occupant safety.

Today, STIDE operates from its new 5,000 m² state-of-the-art manufacturing facility in Türkiye, where every stage of production is managed under strict quality control standards. From engineering and testing to manufacturing and final inspection, our processes are designed to deliver products that meet the highest expectations of both OEM partners and professional converters.

Our product portfolio includes M1-certified Seat & Bed Systems, Seat Swivel Plates, Rail Systems, Rail Fix Systems, Sliding Door Table Systems, and innovative interior solutions developed specifically for modern camper vans and commercial vehicles. Every product is engineered to maximize functionality, comfort, and space efficiency while maintaining a factory-quality appearance.

Safety is at the core of everything we manufacture. Our seating systems have successfully passed TÜV SÜD testing in accordance with ECE R14, R16, and R17 regulations. In addition, our Sliding Door Table System, together with its ABS interior trim components, has been tested and certified with flame-retardant (fire resistance) reports, ensuring both passenger safety and compliance with international standards.

As a trusted supplier across Europe, STIDE continues to invest in research, engineering, and advanced manufacturing technologies to develop products that set new benchmarks in the industry. We are proud to showcase our latest innovations each year at Caravan Salon Düsseldorf, where we continue to strengthen our partnerships with customers and distributors from around the world.

STIDE Sliding Door Table System For Volkswagen T6 New Transporter Ford Transit Custom

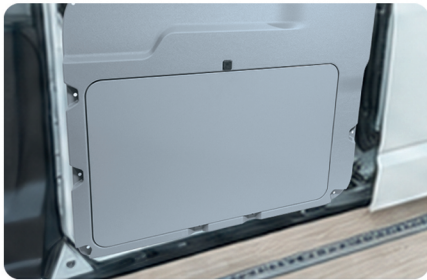

Manufactured using high-quality materials, both the ABS interior trim panel and the table assembly are tested and certified with flame-retardant (fire-resistant) reports, providing enhanced safety and compliance for camper van conversions.

Camping chairs are not included in the set

3 STEP OPERATION

1 OPEN DOOR

2 FOLD TABLE OUT

3 READY TO USE

Designed specifically for the Volkswagen T6/T6.1, New Volkswagen Transporter, and New Ford Transit Custom, the STIDE Sliding Door Table System transforms the unused space inside the sliding door into a practical and elegant camping table. Engineered to integrate seamlessly with the vehicle's original interior, it provides a factory-style appearance without compromising functionality.

The table is securely mounted inside the sliding door, ensuring it remains stable and rattle-free while driving. When needed, it can be deployed in seconds to create a convenient dining or workspace, then folded neatly back into the door panel.

SINGLE SEAT BASES

ENGINEERED FOR SAFETY. BUILT FOR COMFORT

Single seat bases are engineered to provide robust support and stability for individual seats in your vehicle. These bases are designed with precision, ensuring that your seats remain securely anchored during travel, offering peace of mind and comfort."

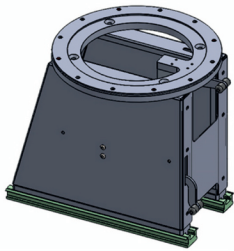

The XSG-575 passenger seat is designed to offer both comfort and flexibility in vehicle interiors. It is compatible with Stide's single seat bases, allowing it to slide smoothly along the floor-mounted double rail system.

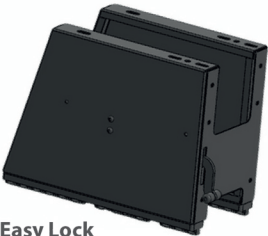

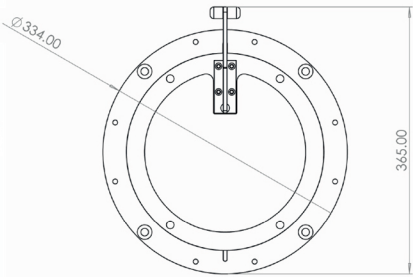

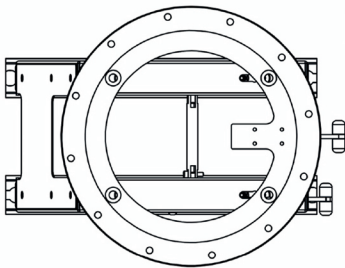

Perfect for both passenger transport and camper conversions, this seat can be configured in various layouts, accommodating 2, 4, 6, or even 8 seats to suit different vehicle needs.

- **Twin Lock:** This model features an internal twin locking system, making it particularly suitable for commercial and high-demand environments such as public transportation, ambulances, and emergency vehicles.
- **Easy Lock:** With a single lever operation, the Easy Lock model is optimized for camper vans and leisure vehicles where quick and convenient seat adjustments are necessary.
- **Swivel Option:** Available with a 360° swivel feature for enhanced mobility and versatility, especially in leisure vehicles.

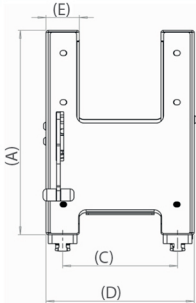

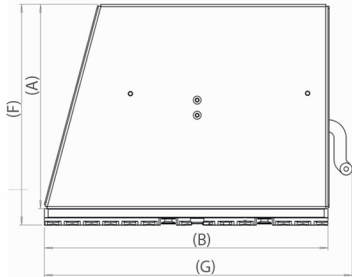

EASY LOCK

Easy Lock Swivel Combination
BAZA-A-H270-150 + ILICA-XI000

Easy Lock

360° 360° SWIVEL OPTION

Add-On Option: 360° Swivel
for Maximum Versatility

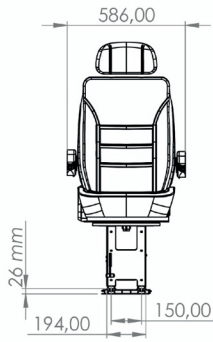

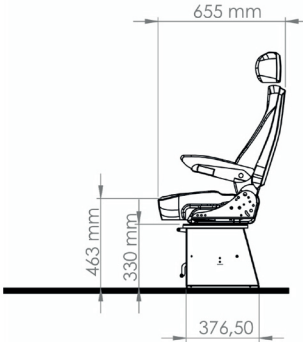

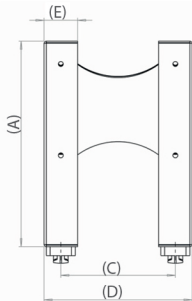

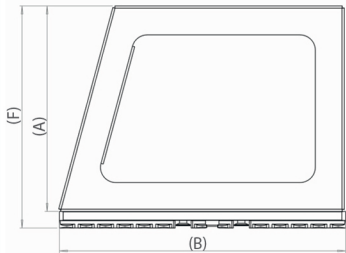

For enhanced flexibility, the Easy Lock model can be upgraded with a 360° Swivel Seat Base. This add-on enables the seat to rotate in addition to sliding forward and backward, making it perfect for campers and versatile passenger setups. The swivel functionality ensures that you can face any direction as needed, maximizing the usability of your vehicle's interior space.

Please Note: Rails and additional accessories are sold separately to provide you with a fully customized setup.
